

# FRONTEND

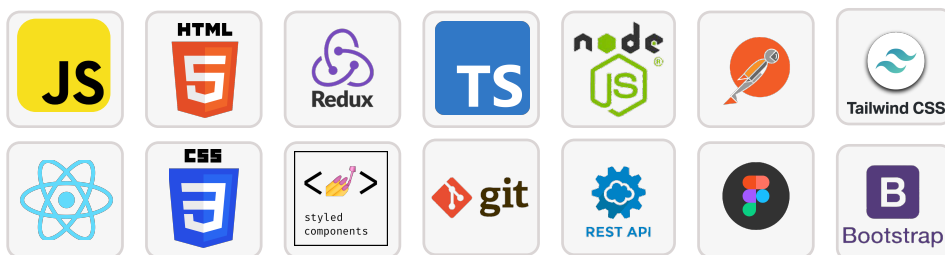

[abdunazarov.me](https://abdunazarov.me)

## Abdunazarov Rivojiddin

I am a 24 year old front-end engineer who has been building web applications mainly on React. So far I have participated in several projects and really improved my practical experience and confidence on building and deploying front-end applications.

Education

Experience

## Personal Projects

### Covid19 tracking app

[Covid tracking app](#) is very useful to track the latest covid cases and vaccinations all over the world from the reliable sources and apis. Its fancy look with an existance of react-simple-maps and charts gives a visitor marvellous user experience. I used [Reactjs](#), [Redux](#), [JavaScript](#), [Styled Components](#), [React Simple Maps](#), [Apis](#), [Axios](#), [Figma](#) to build the app. Source Code: [GitHub](#)

### My blogging app

[My blogfolio](#) is my personal portfolio app by which I share useful blogs and posts about frontend. This awesome looking app has been integrated with backend. It has a nice authentication feature which treats author, admin and user seperately. I used [Reactjs](#), [Firebase](#), [Firebase auth](#), [Styled Components](#), [React hooks](#), [Figma](#) to build the project. Source Code: [GitHub](#)
